Thanks, Debra! I was just talking about this, to some degree, with Shanta during her general. Let me ponder a bit over this, and get back to you no later than tomorrow. Let me know if that works for you, as I may decide to informally discuss some of these items with Marietta, and see where doing so may lead us.

Best,

MJJ

Subject: summary of aldicarb meeting

Hi Marion,

The aldicarb meeting went fine. **Ex. 5 Deliberative Process (DP)**

Ex. 5 Deliberative Process (DP) Shanta- please fill in any gaps you see.

Ex. 5 Deliberative Process (DP)

Shanta was instrumental in getting a more realistic number from the science teams on the timeline on what they think they might need to do these models/write-ups. This number is 6 months (earliest with preliminary numbers from EFED would be the end of Oct. to mid-Nov.). Be aware that this 6 months does not include any additional time that RD/management may need for briefing up through the channels.

RD also must get confirmation from the registrant on the incorporation depth needed for this use (2 inch vs. 1.5 inch) and confirm the well set-backs on label are what are “wanted”, etc.

We thought that we should be able to get these confirmations during the renegotiation discussions and also introduce the idea that the registrant may need to start thinking about removing other crops for citrus to fit.

Ex. 5 Deliberative Process (DP)

Let us know.

Thanks.

Debra
